MATERIAL SAFETY DATA SHEET

ANTIFOULING SEAGUARDIAN

1. IDENTIFICATION OF SUBSTANCE AND COMPANY

Approved for use
Approved for laboratory use
Approved by Jotun AS

TRADE NAME ANTIFOULING SEAGUARDIAN
APPLICATION Antifouling paint
FORMULA Xxxx

ART No. PM3051

Producer/importer JOTUN-HENRY CLARK LTD.
Address Flixborough, Scunthorpe
Postal code North Lincolnshire DN15 8RR
Country UK
Telephone +44 1724 40 00 00
Fax +44 1724 40 01 00
Contact pers. QA/Environm. dept., JOTUN A/S, NORWAY
Responsible QA/Environm. dept., JOTUN A/S, NORWAY
Emergency Contact the National Poison Center

Legend: TÅ=Very toxic, T=Toxic, C=Corrosive, Xn=Harmful, Xi=Irritant, E=Explosive, O=Oxidising, FÅ=Extremely flammable, F=Highly flammable, N=Dangerous for the environment

INGREDIENT COMMENTS
Substances presenting a health hazard within the meaning of the current issue of the CHIP Regulations or assigned occupational exposure limits.

3. HAZARDS IDENTIFICATION

Harmful

FLAMMABLE. HARMFUL BY INHALATION, IN CONTACT WITH SKIN AND IF SWALLOWED. MAY CAUSE SENSITIZATION BY SKIN CONTACT.
For potential danger for the environment, see section 12.

4. FIRST AID MEASURES
MSDS
MATERIAL SAFETY DATA SHEET

ANTIFOULING SEAGUARDIAN

GENERAL
In all cases of doubt, or when symptoms persist, seek medical attention. Never give anything by mouth to an unconscious person.

INHALATION
Keep the patient warm in a quiet place with fresh air. If breathing has stopped, administer artificial respiration. If unconscious place in the recovery position. Seek medical advice.

SKIN CONTACT
Remove contaminated clothing. Wash skin thoroughly with soap and water or use an appropriate skin cleaner. Do NOT use solvents or thinners.

EYE CONTACT
Remove any contact lenses. Hold the eyelids apart. Irrigate copiously with clean, fresh water for at least 10 minutes. Seek medical advice if symptoms persist.

INGESTION
DO NOT INDUCE VOMITING. If accidentally swallowed obtain immediate medical attention. Keep at rest. Seek medical advice.

MEDICAL INFORMATION

5. FIRE-FIGHTING MEASURES

EXTINGUISHING MEDIA
Recommended: alcohol resistant foam, CO2, powders, water spray. Not to be used: water jet.

FIRE AND EXPLOSION HAZARDS
Fire will produce dense black smoke containing hazardous products of combustion (see Section 10). Decomposition products may be a hazard to health.

PROTECTIVE EQUIPMENT FOR FIRE FIGHTERS
The personal protective equipment required is provided in section 8. Professional fire-fighters are required to use an air-fed system when dealing with major fires.

OTHER INFORMATION
Cool closed containers exposed to fire with water. Do not allow run-off from fire fighting to enter drains or water courses.

6. ACCIDENTAL RELEASE MEASURES

OTHER INFORMATION
Exclude sources of ignition and ventilate the area. Avoid breathing vapours. Refer to protective measures listed in sections 7 and 8. Place in container for disposal according to local regulations (see section 13). Contain and collect spillage with non-combustible absorbent materials, e.g. sand, earth, vermiculite and diatomaceous earth. Do not allow to enter drains or watercourses. Clean preferably with a detergent; avoid use of solvents. If the product enters drains or sewers, the local water company should be contacted immediately; in the case of contamination of streams, rivers or lakes, the Environmental Agency.

7. HANDLING AND STORAGE

HANDLING ADVICE
Vapours are heavier than air and may spread along floors. Vapours may form explosive mixtures with air. Prevent the creation of flammable or explosive concentrations of vapour in air and avoid vapour concentration higher than the occupational exposure limits. The product should not be used in vicinity of open flames or other sources of ignition. Use explosion-proof electrical equipment. The product may charge electrostatically. Allways use earth (ground) wire when transferring from one container to another. Personnel should wear anti-static clothing and footwear. Floors should be electrically conductive. Keep container tightly closed. Exclude sources of heat, sparks and open flame. Use non-sparking tools. Avoid skin and eye contact. Avoid inhalation of vapour and spray mist.
ANTIFOULING SEAGUARDIAN

Smoking, eating and drinking are forbidden in the work area. For personal protective equipment see Section 8. Always keep in containers made of the same material as the supply container. Never use pressure to empty the container, it is not a pressure vessel. Electrical equipment should be protected to appropriate standards. The Manual Handling Operations Regulations may apply to the handling of containers of this product.

STORAGE
Store in accordance with the regulations for flammable materials. Observe the label precautions. Store in a dry, cold and well ventilated place away from sources of heat, ignition and direct sunlight. Store separately from oxidising agents and strongly alkaline and strongly acidic materials. No smoking. Containers which are opened should be properly resealed and kept upright to prevent leakage.

8. EXPOSURE CONTROL/PERSONAL PROTECTION

EXPOSURE CONTROL
Provide adequate ventilation. Where reasonably practicable this should be achieved by the use of local exhaust ventilation and good general extraction. Spray mist contains all substances of the product and must not be inhaled. OELs are taken from the current version of EH40 (by Health & Safety Executive, UK).

RESPIRATORY PROTECTION
When use of roller or brush, then charcoal filter is sufficient. Use respiratory protective mask with charcoal and dust filter (A2/P2) when spraying this product.

EYE PROTECTION
Eye protection designed to protect against liquid splashes should be worn.

HAND PROTECTION
Use PVA/viton gloves. Barrier creams may help to protect exposed areas of the skin but are not substitutes for full physical protection. Never apply barrier cream to contaminated skin.

PROTECTIVE CLOTHING
Wear anti-static clothing made of natural fibre or of heat resistant synthetic fibre. When spraying use suit covering the whole body.

10. STABILITY AND REACTIVITY

: 3 / 6 :
ANTIFOULING SEAGUARDIAN

STABILITY
Stable under recommended storage and handling conditions (see section 7).

MATERIALS TO AVOID
Keep away from oxidising agents, strongly alkaline and strongly acidic materials to prevent the exothermic reactions.

HAZARDOUS DECOMPOSITION PRODUCTS
In a fire, hazardous decomposition products such as smoke, carbon monoxide, carbon dioxide and oxides of nitrogen may be produced.

11. TOXICOLOGICAL INFORMATION

GENERAL
There are no toxicological data available on the product itself.

INHALATION
Exposure to organic solvent vapours may result in adverse health effects such as irritation of the mucous membrane and the respiratory system and adverse effects on the renal and central nervous system. Symptoms and signs include headache; dizziness, fatigue, muscular weakness, drowsiness and in extreme cases, loss of consciousness. Inhalation of smoke (from a fire or from welding on dicopper oxide coated material) may give symptoms like influenza.

SKIN CONTACT
Repeated or prolonged exposure may cause skin irritation and dermatitis, due to the product's defatting properties. May cause sensitization by skin contact.

EYE CONTACT
Splashes in the eyes may cause irritation and reversible local damage.

INGESTION
Absorbed by the gastric intestinal system. May cause liver and kidney damage. Accidental ingestion may cause vomiting and abdominal pains. Risk of chemical pneumonia.

12. ECOLOGICAL INFORMATION

DEGRADABILITY
Aromatic hydrocarbons C9-C12: Not easily degradable.

ACCUMULATION
Aromatic hydrocarbons C9-C12: Potential to bioaccumulate.

ECOTOXICITY
Aromatic hydrocarbons C9-C12: LC50 (fish) = 1-10 mg/l.

OTHER INFORMATION
Do not discharge the product to sewer or drains. The product contains aromatic hydrocarbons C9-C12 labelled "Dangerous for the environment".

13. DISPOSAL CONSIDERATIONS

GENERAL REGULATIONS
Wastes, including emptied containers, are controlled wastes and should be disposed of in accordance with regulations made under the Control of Pollution Act and the Environmental Protection Act. Do not allow into drains or water courses. Waste must be disposed of at approved landfill/waste storage or treatment facility.

CATEGORY OF WASTE
08 00 00 WASTES FROM THE MANUFACTURE, FORMULATION, SUPPLY AND USE (MFSU) OF COATINGS (PAINTS, VARNISHES AND VITREOUS ENAMELS), ADHESIVE, SEALANTS AND PRINTING INKS. 08 01 02 Waste paints and varnish free of halogenated solvents.

Transport only in accordance with ADR for road, RID for rail, IMDG for sea transport and IATA for air transport. ADR / RID: Not restricted, ref. chapter 2.2.3.1.5 (applicable to receptacles of less than 450 litre capacity).

15. REGULATORY INFORMATION

Classif.: Harmful

COMPOSITION
DICOPPER OXIDE (25-50), XYLENE, mixed isomers (10-25), ROSIN (2,5-10)

R-PHRASES
R10 Flammable. R20/21/22 - Harmful by inhalation, in contact with skin and if swallowed. R43 May cause sensitization by skin contact.

S-PHRASES
S23 Do not breathe vapour/spray. S36/37 Wear suitable protective clothing and gloves. S38 In case of insufficient ventilation, wear suitable respiratory equipment.

REFERENCES
The product is labelled for supply in accordance with the current issue of CHIP Regulations, and latest version of the approved supply list.
